

Data Science And AI, Tops Technologies, CG Road

A circular portrait of a man with dark hair and a mustache, wearing a light blue shirt. He is looking directly at the camera with a neutral expression. The background is white.

Detail-oriented and passionate Software Developer with hands-on experience in building full-stack applications, mobile apps, and interactive web systems. Skilled in Java, Android, Firebase, SQL, and modern web technologies, with a strong focus on creating efficient, user-friendly, and data-driven solutions. Adept at turning ideas into functional products through clean design, logical architecture, and smooth user experiences.

Degree	Name of Institution	Percentage/Grade	Year of Passing
Data Science and AI Certification Course	Tops Technologies, Ahmedabad	-	-
Bachelor in Computer Science and Engineering	Indus University, Ahmedabad	CGPA = 9.33	2025
HSC (Science - A)	Swastik Shishuvihar Higher Secondary School, Ahmedabad	75.07%	2021
SSC	Swastik English Secondary School, Ahmedabad	80.33%	2019

Indus University, Ahmedabad

- Participated in a Data Analytics Bootcamp, gaining practical experience in data visualization, statistical analysis, and insight generation using modern analytical tools and techniques.
- Worked with real-world datasets to perform data cleaning, dashboard creation (Power BI), and interpretation of analytical results for data-driven decision-making.

June 2023 – July 2023

- Completed Full Stack Development training with hands-on experience in frontend (HTML, CSS, JavaScript) and backend (PHP, MySQL) technologies, strengthening full-cycle web development expertise.
- Learned version control with Git, enhanced team collaboration through project-based learning, and gained exposure to deployment and real-world coding practices.

ManageMart Application

April 2025

- Designed and developed ManageMart, a comprehensive inventory and sales management application featuring secure email/Google authentication, password recovery, and persistent user sessions for seamless access.
- Implemented a centralized dashboard with dynamic charts for real-time sales insights, along with supplier management, profit calculations, and transaction tracking modules to streamline business operations.
- Integrated Excel/PDF import-export functionality, intelligent search, editable data entries, and automatic profit synchronization, ensuring a user-friendly and efficient inventory management experience.

Expense Tracker Application

October 2024

- Created a robust Expense Tracker app that enables users to securely log in, record income and expenses, and categorize transactions by date, category, and payment mode for better financial organization.
- Designed a real-time analytics system that dynamically calculates monthly totals, displaying up-to-date income, expense, and balance values for the selected month.
- Integrated interactive pie chart visualizations that offer insightful overviews of spending habits, with smooth data synchronization and Firebase-backed storage for reliability.

Koenigsegg Car Dealing Website

November 2023

- Developed a visually engaging Koenigsegg car dealership website using HTML, CSS, and PHP, showcasing the brand's legacy, exclusive models, and high-performance specifications.
- Designed an interactive user interface with smooth navigation and visually rich elements to highlight model details, pricing, and customization options.
- Implemented a secure and intuitive booking system, enabling users to configure and purchase vehicles effortlessly while maintaining an elegant and responsive web experience.

Mercedes Benz Car Dealing System

April 2023

- Built a Java-based command-line application simulating a Mercedes Benz dealership, offering users the ability to explore sedans, SUVs, and hatchbacks across electric and petrol variants.
- Integrated detailed vehicle specifications, pricing, and automated billing to enhance the realism of the buying process and improve usability.
- Designed efficient data handling and menu-driven workflows for dynamic vehicle browsing and purchasing, ensuring smooth customer interaction within the console environment.

Independent Coursework:

- | | |
|--|--------------|
| • AWS Academy Cloud Foundations | October 2024 |
| • AWS Academy Machine Learning Foundations | October 2024 |
| • Introduction to C & C++ : Coursera | June 2022 |
-

Skills:

Programming Languages: Xml, Java, C++, C, SQL, Python, Object Oriented Programming

Tools & Software: Git, Power BI, Excel, VS Code, Sublime Text, Android Studio

Cloud Platforms: AWS (EC2, Lambda, Elastic Beanstalk)

Data Science: Data Analysis, Data Visualization

Designing: Figma, Canva

Extra-Curricular Activities:

- Participated in Smart India Hackathon 2024 (College-Level Finalist).
- Attended Odoo Fair 2024 in Gandhinagar to explore ERP solutions.
